May 2011 Supplement Issue number 21

*Beneath the rule of men entirely great*

*The pen is mightier than the sword*

**WE DON'T NEED ICARE TO TELL THE  
INDIGENOUS FOLK OF EASTER ROSS  
WHAT WE WANT.....WE KNOW**

of Waste to Energy plants. Without exception all the Scandinavians expressed satisfaction with the cleanliness and lack of emissions from the facilities.

The Independent Highlander Editor fully endorses the establishment of Waste to Energy plants in Scotland. As for these nimby folk, its high time they woke up to the fact that local recycling is just not viable due to the collection, the transport, the sorting out, and overhead costs, wages, insurance etc.

Lets not forget Inverness City needs to find somewhere to get rid of their tons of refuse annually.

Words of wisdom indeed. Ex Highland Councillor 'J R' Connell, is unashamedly in favour of the establishment of a Waste to Energy facility on the Cromarty Industrial Park, Invergordon.

His belief that such a plant will not prove to be a hazard to the health of the present and future generations in the locality, or elsewhere for that matter, is based on personal assessment of similar plants in both Denmark and Sweden. (John was asked to travel to these countries at Highland Council's expense to assess any impact.)

As an elected councillor, John visited the two aforementioned countries and spoke to umpteen ordinary folk living in the shadow

**FAMILIES IN THE CATCHMENT AREA NEED EMPLOYMENT FOR THE REGENERATION OF EASTER ROSS AND ALSO FOR SUSTAINABLE FAMILY LIFE!**

**YES, WE THE MAJORITY, DO WANT THE WASTE TO POWER PLANT AT INVERGORDON!**

**DOES ICARE REALLY CARE OR NOT ABOUT ANYTHING, OTHER THAN GETTING THEIR OWN BIASED WAY?**

# LETTER TO THE EDITOR

Dear Sir,

How disappointing it must have been for the *ICARE* Chairman and supporters to only be able to muster less than 100 people to the meeting at the Invergordon Academy, despite extensive publicity and expensive flyers and posters, from a population around 5,000, in support of a Local Public Inquiry into the proposed Waste to Energy Plant.

We have the largest industrial park (Brown Field Site) in the Highland Council area, in desperate need for development.

Here we have a chance to be the first in having a modern technology method for dealing with our own domestic and commercial waste. The emissions from the plant will be less than from a conventional barbecue!

Modern technology supporter

*Alda Connell*

Invergordon needs infrastructure, investment and jobs for the community to grow. This plant will have far reaching benefits for the Highlands with regard to transport, cleanliness and jobs and will save Highland Council somewhere in the region of £15 million annually in disposal charges. What could the council Highland Council do with an extra £15 million

pounds? Repair our roads, help our schools, improve our social services?

If *ICARE* care so much about our town and locale they need look no further than the Invergordon Distillery. Come up the hill and take a look at the cottages.

*ICARE* if they care, should begin with the problems we already have instead of creating imaginary ones.

Yours faithfully, Alda Connell. Invergordon.
